

Transcript of “SSP Alliance Updates Resume – Dark Fleet, Earth, Moon and Mars Briefings” with Corey Goode and Dr. Michael Salla – May 8, 2021

You Tube: <https://www.youtube.com/watch?v=tuwVffQ6WBo>

* * * * *

Corey Goode: Hello. Welcome to the Sphere Being Alliance YouTube channel. This is Corey Goode and today I'm talking with Dr. Salla.

As a lot of you know, I gave a couple of real . . . really more of hints towards what I'd received recently from updates. I gave little summaries here and there. A lot of people probably missed it.

Today, I'm going to talk to Dr. Salla, and he's going to kind of go over questions that he had about what I had posted online.

How are you doing Dr. Salla?

Dr. Michael Salla: I'm great, thanks, Corey. It's very exciting that you're getting these updates again and you obviously had a meeting with a group. You did send me an update.

So, you talked about Gonzales and the Mayans.

So maybe, you know, what happened? Can you describe how you got the update?

Corey: Yeah, typically Gonzales picks me up just sporadically just to check on my health and to abate certain things that I have going on.

One of these random times, I got picked up. Right after I had my little examination, I expected to just go back home. Very little chit chat, normally.

But Gonzales said he had some people from the SSP Alliance that wanted to talk with me.

For about a year now the Lunar Operation Command, which controls air space, the flight corridors, had locked down after a number of incidents occurred, including Sigmund being assassinated on premises.

A lot of things really occurred after that.

So they pretty much wanted to give me an update of what's been going on and what's been happening with the different space programs from the intel that they have.

You know, they still have people here and there implanted within these different programs. And these different programs are looking for them right now.

Dr. Salla: So with Gonzales, we know he's with the Mayan SSP. Is he still acting as a liaison to the Earth Alliance or to the SSP Alliance?

Corey: He is with the SSP Alliance. He broke off pretty much all ties with anything earthly and fully joined up with the Mayan group.

Dr. Salla: Right.

Corey: That's his status.

Dr. Salla: Okay. So he's attending meetings or being briefed by people in the SSP Alliance and then passing on that information to you.

Corey: Well, that's typically how it occurred, but I think this is the first time he had met with them in some time.

And instead of relaying information to me, which he was doing less and less over time, this

was actually an arranged face-to-face meeting with people on the Mayan ship from the SSP Alliance.

Dr. Salla: Can you describe anything about the operation of how you're picked up, how this communication happens, like, you know, do you get a warning? Do you get told to be in a certain place? What happens?

Corey: I never have ANY warning whatsoever. It's just completely random.

In the middle of the night, I will find myself on the Mayan ship. They will try not to disturb me too much.

They do their little tests and whatever they're doing with me, and then they send me back. That's typically what it is.

Gonzales is there. He speaks less and less. He's become more and more like one of the Mayans.

Dr. Salla: Okay. And these are like physical extractions from your home. We're not talking astral out-of-body.

Corey: As far as I know. It's, it's, it's, it is perceived as a physical experience anyway. I'm physically interacting with the Mayans and I physically interacted with the SSP Alliance people that were there.

Dr. Salla: Okay. Okay.

So in the update that you sent me, you're talking about the Interplanetary Corporate Conglomerate and how they've locked down corporate cities and facilities on the Moon, Mars and their mini-colonies elsewhere in the Solar System.

So what's happening with the Interplanetary Corporate Conglomerate?

Corey: Well, a lot of it goes back to Sigmund and the information I relayed a couple years ago now.

The information that was given to him about Dark Fleet had their entire rosters – all of their assets. Anyone who was even a puppet of theirs was all in this information that Sigmund handed over to the SSP Alliance.

And then it was disseminated through several of the other SSPs – at least three.

I know that the Global Galactic League of Nations received the information and they began taking measures to look for “double agents”, I guess you would call them.

Because really, you hear all these people talking about Dark Fleet, but no one really fully knows what it is.

It's sort of like kind of a “Hydra” type of operation that's not completely . . . It has its own little bases and its own assets that it's stolen or had given to them in different ways that they operate with, but most of their infrastructure operates in the skirts of the other space programs.

There's money being . . . or assets, it's not really money, but, you know, they're given a certain bandwidth of assets and some of those are divvied over to these darker programs which is the Dark Fleet.

So that's why the Dark Fleet people are popping up even on the research vessel we were on. They had an entire section of the ship that was off-limits that people that weren't even assigned to our ship had access to. They would come and go at different times. The ship was configured that way.

So they were involved in all the programs and were embedded at the Lunar Operations

Command.

They were working with full knowledge . . . The ICC had full knowledge of it.

So the ICC was kind of caught holding the bag.

The Dark Fleet is basically suspended. All of the people that were revealed on these rosters have gone into hiding or gone off to other, like, Reptilian colonies and other places to where they're seeking refuge.

The corporate cities and facilities that create items that we trade are all completely locked down, more totalitarian than anything they've ever experienced before.

They're all being interviewed. They're all being watched very closely, and they're looking for SSP Alliance, but they're also looking for Dark Fleet friendlies within. It's kind of like a paranoia thing going on.

And the Global Galactic League of Nations has been working more and more with this Galactic Federation Group. And there are several.

We hear people talking about "Galactic Federation". There's not just one.

But there's a Galactic Federation group that the Global Galactic League of Nations has been working with. And they're working more and more with them and becoming more and more autonomous from us. They're basically a complete breakaway civilization now.

They are under the tutelage, I guess you could say, of positive beings.

Dr. Salla: So with the Global Galactic League of Nations this information that Sigmund revealed or released, that filtered through to the leadership or to the rank-and-file in that organization and that made them kind of like clean up their act or identify compromised personnel. And they're working more closely with these different galactic federation.

Is that a fair summary?

Corey: Yeah, because within this information that Sigmund disseminated was also information about a bunch of trade . . . the human trade, biologicals trade, and technologies that the ICC was secretly using this Dark Fleet to trade all of these different things with different civilizations that were on the "no trade" list when we made deals with positive, more positive, beings. Or maybe not "positive", just kind of amoral. By our standards some of us may not consider them positive.

So that is a potential conflict and a violation of laws that would allow some of the positive beings to come in and clean up. But that has not occurred yet.

We're hearing a lot of information that Reptilian bases are being cleaned out.

No, they are very much still there.

The Reptilian bases in Antarctica, there's some in Alaska, Africa, even California underground, Mexico. All of those are still completely intact, but they've taken in a lot of human refugees, and I don't know how well that will work out for the human refugees.

These human refugees had been working side by side with the Reptilians in trade and conquests for decades.

Dr. Salla: So just while we're on the Global Galactic League of Nations, they largely operate outside of our Solar System doing this exploratory work to find technologies that might defend us from hypothetical alien attack. I mean, that's what, if I recall, you've explained in the past.

So now, because they have forged these relationships with more positive extraterrestrial groups associated with these different Galactic Federation organizations out there, this

kind of information of these atrocities occurring . . . that compromises them? Is that why they're concerned? Are they under some kind of lockdown as well as far as you know?

Corey: They are completely outside of the Solar System, this group. And it was created by all of the different nations contributing a small percentage of their GDP to a giant "Continuity of Species" program.

Initially, they're the ones that were building a lot of these underground bases, which slowly got taken over and redirected.

But this money also went to help them build out colonies in other star systems.

And they were really to have all of the science knowledge of humanity, all of the best genetics.

The people there are extremely healthy. They have been through all sorts of genetic therapy and all sorts of disease and stuff removed from their body – genome: it's all been edited out.

They're kind of living a lot more advanced life like we would like to live.

They've been building out infrastructure and that was their main purpose. It was a purpose of peace. It wasn't really of weaponry, but it was for peaceful purposes.

They were also seeking peaceful contact with other human-like groups.

Dr. Salla: So they still are largely a kind of "continuity of species" operation with colonies outside of our Solar System working with various galactic civilizations and they're very concerned about this Solar Flash event. In your report you mentioned that.

So it seems that they are kind of separated from what is happening currently in our Solar System with the lockdowns, the Reptilian bases and the ICC operations. Okay.

So with the ICC then, what is it that they are doing with these lockdowns? Are they trying to identify operatives from the Sphere Being and also from the SSP Alliance and Dark Fleet operatives?

Are they doing this because they want to squash dissent in these ICC colonies or just because they have this kind of like mindset where if you're not with them then they don't want you there at all?

Corey: I think it is kind of a "saving their own ass" sort of angle for them.

They made some very serious deals with over 900 other civilizations that they were in trade with, and the deal was: "We'll do trade with you, but you cannot do trade with these groups." And we agreed to it and their ramifications.

So I don't know what those ramifications are, but I don't think the ICC wants to experience them.

And just like the Cabal and all these different groups, they always have a fall guy. They always have a group or person below them that they can say: "They were acting autonomously. This was horrible. We're going to punish them." But really, it was their "left hand" that was doing it.

Dr. Salla: So the information leaks from Sigmund really created this problem for the ICC because then it became more widespread within that . . .

Corey: It created utter chaos.

Dr. Salla: I see. Okay.

Well, there's some information out there that the human civilizations, or the human colonies, on Mars are being encouraged or assisted by one of the galactic federations to

rebel. Do you know anything about that?

And that the indigenous peoples on Mars, and we're talking about the indigenous Reptilians, the indigenous insectoids, are being aided by the Galactic Federations, or one of them to rebel against the Reptilians, against the human overlords.

Do you know anything about that?

Corey: I'm not aware of any Reptilians or insectoids that are native to Mars. They have all come from other timelines and from other star systems over eons. They may have lived there for many, many generations, but that's not where they're from.

But the bases, the cities, they are such totalitarian type of environments anyway to where it's like they are psychologically suppressed too.

It's like in South Korea you have all of these people starving. Why aren't they storming the cities? They've been psychologically all of their lives put into this like Manchurian Candidate kind of . . . That's not the right word . . . put into this really weird mental state, and it is so locked down that I don't see how they could really fight back. It's a complete totalitarian system that they're in.

[Note: Corey means North Korea, not South Korea.]

And the fact that the SSP Alliance had infiltrated some of these places and had detonated devices in some of the places where they produced certain items that they trade outside of our Solar System.

Some of the ships that were used we were able somehow to sabotage them, and then they were left kind of derelict and got busted by other groups.

So there have been a number of things that the SSP Alliance has done that has been crippling things and harming things, but in return they've locked down even more.

A lot of these people are not working. The facilities aren't producing a lot of the things that they trade right now. So a lot of these people are like prisoners in their rooms.

It's gotten really gloomy for a lot of them.

Now, that's not to say that that's going to change. We definitely expect it to change, but now is not a time for people who are down into the Earthly Alliance stuff or Space Alliance to kick back and start celebrating victory because you're celebrating prematurely.

There's a lot of conflict going on even between China and Space Force assets. We've seen some stuff raining down on Earth because of that.

There are things going on, on multiple levels, that show that the leadership of this breakaway civilization is on its heels, but by no means are we in a victorious situation right now. Not yet.

Dr. Salla: So, while there is this kind of like general sense that there's an awakening process on the Earth where there is more resistance now to the Deep State and greater awareness, and, of course, there's political turmoil in the United States at the moment, on Mars you're saying that there's nothing like that. That there isn't that same general awakening? Or that the people are just so intimidated, so dumbed down . . . It's kind of like North Korea where they just live in fear and whatever they do doesn't mean anything given all the resources and the power of the ICC leadership on these Mars bases.

Corey: I can't even communicate to you the energy when I interacted with these people and the mindset that they have. They have for generations grown up in that environment and they are different than you and I.

Dr. Salla: So in terms of the liberation of Mars, if we can talk about that, would this have to

happen through some major military incursion like the SSP Alliance or maybe working with some extraterrestrial groups come in and remove the ICC leadership? Or is there a positive faction within the ICC leadership which can bring about change?

Corey: You know, it's hard to say. I wish I had more encouraging information.

There are cosmic laws that prevent ET groups from just saying, "All right. Enough of this BS. We're going to go in and clean up the Earth."

That's just not how it works.

These representatives of humanity, whether we voted them in or not, have been making agreements and have been doing things on our behalf for a long time and there are ramifications to that.

And there are cosmic laws that have to be abided [by] and we have danced with the Devil and there are ramifications.

Now the ICC is obviously worried about violating some of these agreements. If enough came out, I guess galactically speaking, about these violations of agreements, then there could be some ramifications with extraterrestrial groups, but I don't know how much they are allowed to come into our area and do . . . as opposed to just cut them off.

It's not as easy as a bunch of galactic groups getting together and just saying, "We're going to go in and clean up this planet."

There are cosmic laws. All of us on this planet are taking part in this giant financial slavery system. So by doing so we're tacitly going along with it all.

People don't like to hear it, but what am I supposed to do: live out on an island somewhere that no one knows about?

It starts down here. A lot of it starts down here. Once we start cleaning stuff up down here, it's probably going to open things up a lot more out there.

But for now, it's a major totalitarian system out there that the humans have created.

Dr. Salla: Well, when it comes to these Reptilian bases . . . We've heard this again and again from various sources that Reptilian bases are being taken out by positive extraterrestrial groups and that the Reptilians are no longer a problem, and so forth.

But you're saying that the Reptilians are still around. They still have bases on the Earth, on the Moon, on Mars, and they're still calling a lot of the shots.

Corey: They're still exercising their influence in this Solar System, but this is it for them. This is their last foothold. They're sort of cornered here.

This is the last big hurrah. They are sort of a wounded dragon which is the most dangerous type of dragon. They are wounded.

They have fear. They see that they're in a situation, but they're still fighting steadfastly.

And we need to keep doing the same. We need to keep sending out the energy out there to all the different beings that are in conflicts with them and keeping them contained and giving us an opportunity to deal with our part of the mess. And that's the part that we've got to do.

We hear people online. You see people get censored. You don't see anyone outside of the company that censored them with signs.

People talking about issues with whether they believe voting was rigged or not. You don't see people out.

People have been lured into this thing to where this . . . you know, the Earth Alliance: "It's

all under control. Just sit back. It's okay." "The beings in space have it all under control. Sit back. It's all okay."

That is not humanity breaking our horrible cycle of looking up to the sky or into space or for other beings to come and save us.

Right now is a critical time for humanity to get out and act and do and change and we have to do our part. We can't just sit back and expect these beings to come in and clear out the planetary system for us and then just hand us the keys to everything.

Dr. Salla: Yeah, that's very important what you just said. And maybe would help to clarify because there is this perception out there that the White Hats are in control and we just kind of like got to sit back and kind of watch them do their thing and kind of out maneuvering the Deep State and exposing a lot of stuff, but you're saying that there needs to be much more activity, political activity, or . . .

Corey: And all of that that people are hearing on the Internet it's hyperbole. It's hopeful stuff, but all of the information I got from really top people is that the military has set up some sort of a council that's looking into possible foreign interference in elections and that kind of thing and that's it.

And that all of the people that were big Alliance people are now moving into politics and trying to take over certain parties and clean out other parties.

So that's what I'm hearing. I'm not hearing that people are being hanged. I'm not hearing any of this.

I'm hearing that it's another Phase Two or Plan B of the Alliance to try to root out these horrible people, and it's . . . And everyone's polarized. You know, "Well, the Left. Oh, it's horrible." "The Right. Oh, it's horrible."

It's not. It's . . . Both sides are completely infiltrated and both sides need to take a close look and clean it up. That's it. It's all, you know . . .

Even in the UFO community, everyone's got their own little "truths" and they're all sort of battling each other for them.

I think that's more of a sign of End Time Madness than it is enlightenment.

Hopefully, people can start working through some of this and begin to contribute and act like we were saying.

Dr. Salla: Uh-huh. So the information that there's a lot of Deep Underground Military Bases that are being raided by Special Forces, by the White Hats, by the Earth Alliance, positive ET groups, and that these are being taken over or destroyed and a lot of children and a lot of enslaved people are being rescued, your sources are telling you that that's not happening?

Corey: My sources are telling me that it WAS happening, but all of those resources were basically strangled when things switched over in the last year.

Dr. Salla: Okay.

Corey: So that there were certain . . . not . . . It wasn't as widespread as people are reporting either.

There were some key facilities and underground bases that were taken out and there were even regular Marines that were sent into some of these situations that weren't briefed on the possibilities of ETs being there because they didn't think they would be there, but they had like joint little areas or little areas segmented off for a small ET delegation, and they ran into those and it freaked the guys out.

There were some major things going on, but those things have started to curtail quite a bit and a lot of things have changed in the leadership of the military. A lot of energy has shifted.

A lot of this is going to be up to us. There is an Alliance or groups out there that are trying to end corruption on both sides, but they're doing their job. We need to do ours.

Dr. Salla: What about the Moon? Is the Moon . . . Has it been cleaned out as some are saying or is there still a lot of work to be done there?

Corey: No, the Moon has many, many different ET groups on it. It's basically like how we carved up Antarctica and gave nations different zones. There are different zones on that planet that belong up to like 90 different ET groups – a lot of them involved in these genetic programs.

They're all operational. There are Reptilians that are there. There are insectoids that are there. Everything is still operating there.

The only thing that really changed was that there was a Dark Fleet base that was there that was a giant prison, and also they did experiments and research and development there on prisoners.

They found huge cryogenic containment little pod, prison pods, that had HUGE beings in them that . . . I mean, like dinosaur-size that are contained.

They had all different sorts of the human ETs that were being held there, but when everything came out, including the information about that prison because of Sigmund, they abandoned . . . All the people that were minding that base they abandoned it.

And then the ICC moved in, supposedly “not knowing about it”, and have been cataloging everything.

Dr. Salla: So the ICC, as far as the human side of things is concerned, is still in control of the Moon.

The different ET races that have historically used the Moon as a launching pad for doing stuff on Earth are still there.

So has there been any kind of significant change at all in management, you know, like 2024, the Artemis Project begins in terms of the first Moon landings with humans?

So is that reflective of some kind of change? Or is it just business as usual? They're not too concerned about Elon Musk using his starship to send a few shiploads of people over there and start working on building a base on the Moon.

And then they plan to have a permanent “Gateway” they call it around the Moon.

I thought that reflected a change of management on the Moon, but it sounds like you're saying the Moon is still . . . the management system is still in place. No big changes.

Corey: No really big changes. The Lunar Operation Command went through some serious management and people changes. They realized that the only way the Secret Space Program and their allies, the Alliance, were getting to and from certain locations on the Earth was that they had help on the inside opening up corridors allowing them to fly to and from without being [detected] . . . popping up as a [unintelligible].

Dr. Salla: So, if I was . . .

Corey: They swept out quite a few people that worked there – swapped them out with fresh people.

Dr. Salla: So if I were to kind of like summarize everything that you've said so far, it's . . . you know, the idea that we're going to be rescued, whether it's by positive groups, whether

ETs, or whether the SSP Alliance, or the Earth Alliance, that it's not as simple as that.

That WE as a planetary civilization need to take more control of our destiny. We need to become more informed. We need to become more active.

And at the moment, to put it bluntly, what we're kind of . . . As a collective, we're too lazy. We're still too asleep.

And those of us that are awakened need to do more of just awakening others and spreading this information.

Is that essentially the way forward?

Corey: Yes. It's not only needed: us waking up and starting to make change on the Earth. IT'S REQUIRED! It's a part of cosmic law.

We're not going to have the type of contact that we want with beings until we clean things up down here.

They're not going to want to drop down to a little third-world planet where everyone's turned on one another and no one trusts each other.

How are they going to set up a trusting relationship with us?

So, we're going to have to get our shit together on this planet and contribute to the process. And the more we contribute the more they can.

Dr. Salla: So, what's going to be happening in terms of your efforts to awaken the population to all of these issues? Is there something coming up soon that you think will help awaken people to all of this?

Corey: Well, you know, yeah, there is some things that I have going and all of us need to be prepared for this.

FULL DISCLOSURE is under assault.

These UFO reports that are coming out in June, I believe . . . In the past, I was getting information from the military sources that it was just going to be a bunch of, thousands maybe, of never seen before reports from different military people that had encounters.

And I was like, "Oh, okay. That's really not that big of a deal."

And he said, "Yeah, then afterwards we're going to set up some sort of special council to kind of investigate what it all means."

But very recently, I heard that they're possibly going to release that "ETs are real. We don't know much about them. They're very elusive. They won't communicate with us, but they've been around for a long time observing us."

THAT would be a pretty big drop for most people. Everyone in the ufology community would get excited.

But that's drip, drip disclosure, and even the Earth Alliance, everyone has agreed to it because they think it is "responsible".

And what I'm doing with some friends and colleagues is I'm trying to use the entertainment industry to try to bring Full Disclosure back in.

Full Disclosure has been stomped on. You don't even hear people talking about it anymore.

But, you know, thanks to people like Jenny McCarthy – I mean, who would have thought Jenny McCarthy was going to help save the Full Disclosure narrative – here pretty soon we might be able to announce some show that we'll be doing together that's going to make a big difference.

The graphic novel . . . I was guided to do a graphic novel – everyone was fighting me on it – and then to build everything off of that, you know.

Things are moving with the scripted series and we're building out our platform to start having spiritual content on it, and now we've got a few people that are in actual production right now to create shows with us and courses.

We're doing everything we can to try to get this out into the mass consciousness.

And I think everyone out there should start looking into their wheelhouse for their skills and talents and try to figure out how they can contribute .

Dr. Salla: Great. So, with future updates, do you expect to kind of get more regular updates from Gonzales and the Mayans? And what about the Anshar? Are they still in the picture?

Corey: Yeah. I couldn't predict Gonzales' sporadic appearance. There's just no way.

I still am in contact with the Anshar quite a bit. They are having me work doing a lot of inner work to prepare myself so I can spend more time with them and learn more about

their fourth-density way of life.

Right now, they're pretty much . . . I'm focusing on, you know, doing inner work and getting to the place that I need to be.

Dr. Salla: Great. Okay.

And, I guess, [are there] any kind of upcoming events that you want people to know about?

Corey: Yes. And thank you for asking.

For all this information, you can go to www.coreygoode.com and find out about all these projects.

But if you want to go to www.ascensionsummit2021.com and take a look. We're going to have a major event. It's probably going to be the largest event in the community in the last two years, you know, because of COVID and all of that.

It's going to be in Colorado Springs, Colorado, at the Elegante Hotel. It's a convention center.

We're going to be able to have up to 500 people right now, but if things relax more, we can have up to 1800.

And it doesn't sound like they're going to . . . I don't know how heavily they're going to be enforcing the mask thing. It doesn't sound . . . That county is really starting to make a lot of changes and start to release a lot of the controls they have over everyone.

It's going to be a big event. We're kind of seeing it as a lightworker family reunion.

We have a lot of great speakers and you're one of them.

Dr. Salla: Well, fantastic. I look forward to participating in some way. I definitely feel kind of . . . I'm suffering from island fever at the moment being locked down here on the Big Island of Hawaii.

But thankfully we have a virtual means of being able to connect. So, yeah, definitely that's going to be a big event. We'll include the information link for people that want to be involved in that.

Corey: Yeah, we have a nice lineup of speakers. The first two days we're going to be indoors with speakers and then the third day we're going to go on a zip lining event, hiking, all kinds of cool things.

And we're also going to have something really cool. Go to the website: www.ascensionsummit2021.com and there's an area in the speaker list where it says "Possibly You".

We have three hours where we're going to have little TED Talks to where people from the

community can get up and tell their stories. They get 10 minutes or five minutes or whatever is decided upon.

And we're going to record it all. And if everyone agrees, we might use that in some of these upcoming docu-series that we're going.

Hopefully, really soon we'll be able to announce the major platform that it's going to be on and more about it.

I would love to get as much of the community there and then b-roll in other ways to have on these different television shows.

Dr. Salla: Fantastic. All right. Well, I guess people can just go to your website to get more information.

And I think you're still active on social media, Twitter, and I don't know if the other social media you recommend for people to kind of get updates from you.

Corey: Yeah, they can find it all at www.coreygoode.com. And also I do a lot of my updates on my Telegram channel. I'll put the link below.

But also, don't we need to talk about your book that's been number one for a while?

Dr. Salla: All right. Yes. Yeah, of course. The *Space Force: Our Star Trek Future* has just come out and, yeah, I'm talking about how Space Force is really going to be a gateway for this Star Trek future that everyone in the military wants.

And I know you've in the past said that that's what the SSP Alliance wants. That's what the . . . that they want to do that.

And I was really amazed to see that in 2019 there was a workshop organized by Air Force Space Command that actually said it explicitly that: "Yeah, we are working towards . . . We want to create a Star Trek future."

And I know you've been saying that for a few years, too.

Corey: Absolutely. Also, do you have any of your online courses going on. I know in the future here, when they start to announce that UFOs are real, I bet a ton of people are going to want to take your exopolitics course.

Dr. Salla: Yeah, well, I've got a webinar coming up on May 22. It's going to be called "Antarctica, the Dark Fleet and Humanities Liberation".

So I'm going to just kind of like look at all of the new data on Antarctica that has been coming out and look at some of this information about the Dark Fleet: how it began, how it has spread out through the Solar System. Because for me, it's like this is something that people really need to acknowledge that if we trace back, where did the evil begin?

Or where did it REALLY kind of take off?

It's like what happened in Antarctica with the German breakaway colony, that was the big lie: that the Navy went there to take control. They were cocky. They thought they could expose, flush out the Nazis and take over the place.

And then they suffered this devastating defeat, and they hid it. They kept it secret.

And so I think Operation Highjump: what happened there? I've dug deeper into Operation Highjump: what really happened, what fleets were involved, that there was more than one aircraft carrier and battle group. It wasn't just the Philippine Sea.

So I'll be talking about that on May 22.

Corey: Ah, that's great. Well, there's a lot going on right now. I know a lot of us . . . There's been a vacuum of information and a big letdown from a lot of things that were supposed to

happen.

The Alliance suffered some defeats. They did.

But everyone needs to keep their discernment caps on. They need to figure out how they can contribute to making things better and get out and do it and not just sit back and listen to stories of our salvation when we have to be our own saviors.

We have to contribute to the process.

So I appreciate you giving me an opportunity to discuss this with you and sort of finally get some of the information that I've had out there. I've been sitting on it for a few weeks and then I've had a recent update again with Gonzales. And then I'm expecting another one here really soon.

And on Friday, I'm going to get an Alliance briefing. So I should have some interesting information.

And, again, it'll probably be on my Telegram channel, which you can find below.

But everyone, please, subscribe, click "Like", take a look at Dr. Salla's website and his courses, his book. Get ready for Full Disclosure to be . . . I mean, it's about to take off like it NEVER has before.

It's going to be . . . It's going to be everywhere.

And if this scripted series takes off as well, which I've been wanting to do for years, then we're going to have an opportunity to make a major contribution to the awakening mass consciousness.

And I look forward to it and I hope other people contribute as well.

Dr. Salla: Well, it's been great talking to you again, Corey, and I look forward to more updates in the future.

Corey: Aloha.

Dr. Salla: Aloha.
